Introduction to NECPA Accreditation

The National Early Childhood Program Accreditation (NECPA) Commission is committed to improving the quality of early childhood care and education programs. The NECPA Commission is doing this in several ways. The primary way is through the development and implementation of the instrument based accreditation system, The National Early Childhood Program Accreditation (NECPA). NECPA Accreditation is valid for both Family Child Care Providers and Child Care Centers, who are licensed for seven (7) children or more.

This instrument based accreditation system is a systemic indicator monitoring approach in which the program director, staff and parents evaluate the overall quality of their program. The indicator approach developed by Dr. Richard Fiene is based upon the compilation of key predictor items or indicators that have been identified as predicting the overall quality of a program and/or positive developmental outcomes for children by being in compliance with these key indicators. This approach has been developed, implemented and refined over the past 25 years in research studies Dr. Fiene has conducted in states across the nation and provinces in Canada. The indicator approach has demonstrated its efficiency and effectiveness in the monitoring of early childhood programs. By using the key indicator approach, the number of discrete items to be evaluated is substantially reduced but the overall confidence in the evaluation is maintained.

Content and Organization

The Self Assessment Instrument (SAI) is based upon NECPA standards in the following content areas: administration and general operations; professional development and work environment; indoor environment; outdoor environment; developmental program; parent and community involvement; and health and safety.

Administration and general operations criteria are designed to provide a concise overview of the program’s organization and method of operation. Professional development and work environment criteria are designed to determine the type of environment the program has created for staff. Outdoor environment criteria are designed to explore the ways the program uses the outdoor environment to enhance the development of the children in care. Indoor environment criteria are designed to detail how the program creates a positive environment for learning and social interaction. Health and safety criteria are designed to determine the standards the program has established in order to maintain a safe and healthy environment for the children in care. The Developmental Program criteria are based upon key indicators of quality and developmentally appropriate practice. Community and parent involvement criteria expand to the specific relationships that the program has with parents and with the overall community.

This Instrument is divided into two sections, Part A and Part B. Both sections consist of a “Yes/No” self-evaluative questionnaire. Each question or Verification Item references a specific NECPA Standard from the NECPA Standards Book. All verification items must be answered by the Director with the assistance of the program’s staff and parents to complete each question accurately.

Part A is dedicated to documentation review. To complete this section, the program must compile a well-organized box or file of labeled documentation. This documentation consists of program policies/procedures, records, and staff qualifications that reference each verification item in Part A.
**Introduction to NECPA Accreditation**

**Content and Organization Continued**

**Part B** is dedicated to classroom observations. The director should answer each item only after she or he has ensured that all observable standards are present in each classroom.

Some programs may be subject to additional standards based upon State QRIS Initiatives. If your program is in one of the following states, please reference the corresponding ‘State Standards Section’ in the back of Part A: **Colorado and Ohio**.

**Commonly Used Accreditation Terms**

A full list of terms and references is located in the Glossary beginning on page 125. The below terms are most commonly used throughout the NECPA accreditation process:

**Program Site Number**: Your Site Number is important to the accreditation process. It enables the NECPA Office to anonymously present your program’s verified Self Assessment Instrument to the NECPA Commission and the National Accreditation Council with no identifying information. Please reference your Site Number in any communication with NECPA. Your program Site Number may be found by logging into your ‘Client Profile’ at www.necpa.net.

**Standards Book (SB)**: The NECPA Standards Book (SB) is divided into 14 chapters which encompass all 219 numbered standards. The Standards Book provides additional references, resources, and guidance for implementing NECPA Standards and completing your Self Assessment instrument.

**Self Assessment Instrument (SAI)**: The Self Assessment Instrument (SAI) is used to verify the NECPA Standards that have been implemented at your program. Each standard is directly referenced by a Verification Item located in the Self Assessment Instrument (SAI). The SAI is divided into two parts. **Part A** is dedicated to documentation review and **Part B** is dedicated to observable standards at the program.

**Enrollment/Self-Study Period**: This is the period of time allotted for programs to implement any necessary standards and make changes as needed before their verification visit. The enrollment/self-study period is valid for up to two years. On average, programs are able to implement any needed changes and complete their Self Assessment Instrument (SAI) within 6 to 12 months. New and renewing programs must be enrolled before they can request a verification visit.

**Verification Visit**: A program’s answers in their Self Assessment Instrument are reviewed during their NECPA Verification Visit. The visit is conducted at the program by a NECPA Verifier. The Verifier’s job is to review all documentation and observe all classrooms/areas and note each Verification Item as ‘Verified’ or ‘Non-Verified.’ These answers and all comments are presented to the NECPA National Accreditation Council and Commission for anonymous review and determination of Accreditation Result.
Introduction to NECPA Accreditation

Accreditation Award Process

The following five step overview of the NECPA Accreditation process will help you plan and assess your program’s progress as you seek accreditation. Additional resource materials, templates and checklists are available in the Resource Guide and Standards Book (SB).

1. Enrollment and Self-Study:

   - Once enrolled, your program’s first step towards accreditation is to review the NECPA Standards. Reviewing the standards enables you to evaluate the program and implement any standards which are not currently in place.

   - The enrollment/self-study period is valid for up to two years. On average, programs implement any needed changes and complete the Self Assessment Instrument (SAI) within 6 to 10 months.

2. Verification Visit:

   - Once your program’s Self Assessment Instrument (SAI) is complete and if the program has been in operation for one year, you may request a verification visit at any time during your enrollment period. All items in Part A and Part B must be answered and documentation for Part A labeled with each SAI verification item number in a well-organized box or file prior to submitting a verification visit request.

   - You may submit your visit request online, by email, fax or mail. Please allow up to 120 days for the visit to take place. An expedited visit may be requested, but is subject to an additional fee. You are required to disclose any conflict of interest the program may have with an assigned NECPA Verifier.

   - On the day of the visit the NECPA Verifier will verify ALL answers to each verification item in program’s the Self Assessment Instrument (SAI) by reviewing the documentation box/file and observing all classrooms and outdoor areas. Do not leave any verification items unanswered. At the end of the program’s visit the Verifier will allot time to conduct an Exit Interview to review any comments in Part A and/or Part B. During the Exit Interview, the Director is able provide written responses to all comments made by the Verifier.

3. Accreditation Results

   - Your program’s Self Assessment Instrument is compiled by the NECPA Office into an anonymous profile which is submitted for review by the NECPA National Accreditation Council and Commission. Results are issued by email within 60 days of your program’s verification visit. The NECPA Council and Commission may determine one of the following results:

     - Full Accreditation: This award of Accreditation is valid for three years with proper award maintenance through Annual and Self Reports.
Accreditation Award Process Continued

- **Pending**: Pending requires submission of additional documentation for review before a program may attain full accreditation. Programs have up to 3 months to submit the required evidence. Evidence will be reviewed and results issued within 30 days of submission.

- **Deferred with Items**: This deferral requires substantial additional documentation to be submitted for review before a program may attain full accreditation. Programs have up to 6 months to submit the requested additional evidence. Evidence will be reviewed and results issued within 30 days of submission.

- **Deferred with a Revisit**: A Deferral with a Revisit requires an additional verification visit before a program may attain full accreditation. Programs have up to 6 months to request a Deferral Visit. The visit may take up to 120 days to schedule. Results will be issued within 60 days of the deferral visit.
  - **Appeals**: Appeals must be submitted in writing, clearly stating the reason for your appeal and must include documentation to support your appeal. Appeals will be reviewed within 30 days of submission.

4. **Award Maintenance**

- **First and Second Annual Report**
  - NECPA requires the submission of two Annual Reports in order to maintain accreditation for all three award years. These reports are due within the program’s first and second anniversary months and must be submitted no later than the accreditation anniversary date.

5. **Renewal Process**

- **Re-Enrollment**: To prevent a lapse in accreditation, Accredited Programs should re-enroll at least one year prior to their current accreditation expiration date. This will allow your program enough time to complete a new Self Assessment Instrument, compile and organize supporting documentation, schedule the renewal visit, and receive your accreditation results.

- **Renewal Visit**: Accredited programs are encouraged to submit the verification visit request at least 8 months prior to their accreditation expiration date. This allows for the 120 days it may take the NECPA office to schedule a program’s visit and the 60 days necessary for NECPA Council and Commission review.
Verification Visit Understandings and Agreements

This page is to be completed by the NECPA Verifier and the Program Director during the Verification Visit Exit Interview at the end of the visit.

Part A – Documentation

To obtain verification of each item in Part A it is necessary to review the program’s written documentation. All documents must be well-organized, easily accessible and labeled with each question/item number. It is best to utilize the ‘NECPA Documentation Labels’ provided in the program’s Enrollment Packet to label your documentation.

**ANSWER ALL ITEMS.** If a verification item does not apply to the program, please circle "N/A" for "not applicable." Do not leave any items unanswered. “Reserved” indicates the item is reserved for a future update.

---

**Pre-Verification Visit Documentation Checklist**

- All verification items have been answered in Part A of the Self Assessment Instrument.
- Surveys have been anonymously collected from at least 70% of the full and part time staff members and at least 50% of the families served.
- The Program Contact Information on page 3 is complete with the most current information for the program and Director.
- A copy of the program’s current state license (or exemption letter) is available for the Verifier to collect.
- A well-organized system with labeled copies of written documentation, using the supplied NECPA Documentation Labels for each verification item in Part A, is ready for review.
- All required staff records are well-organized so that the Verifier may review them for compliance with verification item A-141.
  - Diplomas, degrees and credentials of staff members are well-documented. (A notarized statement of credentials will be accepted with appropriate information as to the date and name of the educational institution where a graduation or degree was earned.)
  - All staff training hours from 12 months prior to your visit date are well-organized and ready for review.

NECPA Self Assessment Instrument

Part B - Observation

The questions/items in this section are used to report how well the program meets the NECPA Standards that are observable. The health and safety, the professional and work environments, indoor and outdoor environments, developmental program, and program and community involvement are assessed by the director using this observation section. Each classroom should be assessed by the respective teachers in the classroom in order to assist the director’s observations.

ANSWER ALL ITEMS. If a question/items does not apply to the program, please circle "N/A" for "not applicable." Do not leave any items unanswered. “Reserved” indicates the item is reserved for a future update.

Pre-Verification Visit Observation Checklist

☐ All questions/items have been answered in Part B of the Self Assessment Instrument.
Section 1: Director, Teacher, and Staff Qualifications and Development

No verification items; all standards located in SAI Part A – Documentation.

Section 2: Supervision

B-1) Are all children (including school-age) within sight and sound* of a qualified teacher** at all times?  
Yes  No

Please Note: *Children must be able to be seen and heard at all times by the teacher. For example, if the teacher is working momentarily one-on-one with a child, but is able to see all of the children by slightly moving their position, then this standard is met.

** Qualified teacher is defined as a Lead Teacher/Teacher, Assistant Teacher, Aide, and/or a Substitute Teacher who meets all NECPA requirements.

VERIFICATION  V  NV

B-2) Do all teachers use a visual attendance (name to face) process to document child identification?  
Yes  No

VERIFICATION  V  NV

B-3) How often is attendance taken using the name to face process:

A) When children arrive at and depart from the program?  
Yes  No

B) During any transitions (ex: when going indoors to outdoors or moving from one play area to another)?  
Yes  No

C) During any off-site activities, including field trips and walks?  
Yes  No  N/A

D) When getting off vehicles both on field trips and regular transportation routes?  
Yes  No  N/A

E) Emergency evacuations?  
Yes  No

VERIFICATION  V  NV

B-4) When asked, are all teachers able to accurately state how many children are in their care at any given time?  
Yes  No

VERIFICATION  V  NV
B-5) Are required child:staff ratios maintained at all times, including during naptime?*

*Please Note: NECPA will defer to state ratios **only if** teacher to child interactions are of high quality. This will be observed, verified and reviewed through NECPA Standards regarding teacher to child interactions.

When infants and toddlers are in a mixed age group, the child:staff ratio and group size for infants and toddlers must be maintained.

The ratios do not include personnel who have other responsibilities that they must carry out simultaneously while watching children, such as cooks, maintenance workers, or bus drivers. When transporting children, child:staff ratios must be maintained. Bus drivers may not be used for the purposes of meeting ratio. No person under the age of 18 will be considered for the purposes of determining child:staff ratios.

B-10) Do teachers respond quickly and calmly to prevent children from hurting each other while showing understanding of the children’s needs and feelings? Yes No

VERIFICATION V NV

B-11) Do teachers focus on the positive rather than the negative to teach a child what is safe and appropriate for the child and other children? Yes No

VERIFICATION V NV

B-12) Do teachers address the specific behavior or situation rather than labeling the child ‘good’ or ‘bad’?* Yes No

*Please Note: This item refers to calling/labeling a child ‘good’ or ‘bad’ for a particular behavior or action, this does not refer to praising a child’s work.

B-14) Is there always a readily accessible first aid kit at the program? Yes No

VERIFICATION V NV

B-15) Is there an additional first aid kit available when children (including school-age) are taken on field trips and for off-premises outdoor play, including walks, etc.? Yes No N/A

Please Note: If the program does not conduct activities off-premises, this item may be answered N/A. A supporting policy must be provided as evidence in the labeled documentation box/file for item B-15.

VERIFICATION V NV
B-16) Does each first aid kit contain the following*:

A) Bandage tape; Yes  No
B) Cell phone or coins for use at a pay phone;** Yes  No
C) Cold pack; Yes  No
D) Current American Academy of Pediatrics or American Red Cross standard first aid text or equivalent first aid guide; Yes  No
E) Disposable nonporous gloves and sealable nonporous plastic bags for disposal of bloody materials; Yes  No
F) Emergency numbers; Yes  No
G) Eye dressing; Yes  No
H) Flashlight; Yes  No
I) Flexible roller gauze; Yes  No
J) Insect sting preparation (if allowed by state regulations); Yes  No
K) Pen/pencil and notepad; Yes  No
L) Poison control center telephone number; Yes  No
M) Safety pins; Yes  No
N) Scissors; Yes  No
O) Sealed packages of alcohol wipes/wound cleaning solution; Yes  No
P) Small plastic or metal splints, or rolled magazine, or newspaper; Yes  No
Q) Soap; Yes  No
R) Sterile gauze pads and ‘Band-Aids’; Yes  No
S) Thermometer; Yes  No
T) Triangular bandage or arm-sling; Yes  No
U) Tweezers; Yes  No
V) Whistle. Yes  No

*Please Note: If your state licensing/regulations prohibit any of the above, please note and have a copy of the rule available for the Verifier.

**Item O) A cell phone does not have to be kept in the first aid kit, however it must be accessible for emergency use.
B-17) Do all staff and children wash their hands at the following times:* 

A) Before and after any food service activity (including preparation, handling, setting the table, or serving); 

   Yes  No

B) Before and after eating meals or snacks;  

   Yes  No

C) Before toileting or changing diapers/pull-ups (for staff ONLY); 

   Yes  No

D) After toileting or changing diapers/pull-ups (for BOTH staff and children); 

   Yes  No

E) After assisting a child with toilet use or toileting accidents; 

   Yes  No

F) After having any contact with bodily fluids (including blood and mucus); 

   Yes  No

G) Upon arrival to the classroom, including coming in from outdoor play; 

   Yes  No

H) After handling any animals (including fish, insects and reptiles)? 

   Yes  No  N/A

*Please Note: All staff, children and volunteers must use a state approved handwashing procedure or the following handwashing procedure:

1. Thoroughly rub damp hands with liquid soap, optimally for 20 seconds but no less than 10, and rinse off hands with warm, clean, running water.

2. Dry hands with a single-use paper towel or dryer and turn off faucet with the paper towel or other hands-free method to prevent re-contamination.

3. Deposit used paper towel into hands-free trash receptacle.

**ONLY when clean, running water is unavailable**, the use of hand sanitizers by children over twenty-four months of age and adults in child care programs is an appropriate alternative to the use of traditional handwashing with soap and water. The use of alcohol based hand sanitizer is not an acceptable substitute for hand washing for children under the age of 24 months because of the potential for them to eat the sanitizer rather than rubbing their hands together. Hand sanitizer using an alcohol-based active ingredient must contain 60% to 95% alcohol. A single pump of an alcohol-based sanitizer should be dispensed. Hands should be rubbed together, distributing sanitizer to all hand and finger surfaces and hands should be permitted to air dry.

VERIFICATION  V  NV
B-18) Is the handwashing procedure posted at each handwashing sink?  
Yes  No

VERIFICATION  V  NV

B-19) Do teachers instruct children on handwashing by breaking the process into meaningful steps?  
Yes  No

VERIFICATION  V  NV

B-20) Is there a trash receptacle readily accessible:
   A) For each handwashing sink?  
      Yes  No
   B) And, if applicable, a hands-free receptacle in the toileting/bathroom area if toilet training is occurring for the disposal of diapers and/or pull-ups?  
      Yes  No  N/A

VERIFICATION  V  NV

B-21) Are the toilet doors for children’s use able to be opened on the outside by the teacher?  
Yes  No

VERIFICATION  V  NV

B-22) Are children able to open toilet doors from the inside?  
Yes  No

VERIFICATION  V  NV
Section 5: Physical Environment, Equipment, Prohibited Supplies and Transportation

B-23) Is the overall appearance of the program, both indoor and outdoor, inviting and well-maintained by the following:

A) Areas are clean, free from clutter, and odor-free; Yes No
B) Areas have proper lighting and ventilation; Yes No
C) Facilities, equipment and toys (both indoor and out), are free of chipping or peeling paint; Yes No
D) Broken and inoperable toys or equipment are removed until repaired or replaced; Yes No
E) Indoor and outdoor play equipment is free of pinch or crush points; Yes No
F) A specific entry area is available to greet parents/guardians and guests that is separate from play areas; Yes No
G) Proof that no paint contains lead in excess of 0.06 if facility is built before 1978? Yes No N/A

VERIFICATION V NV

B-24) Are there separate functional areas for food preparation, feeding, sleeping, playing, and diapering? Yes No

*Please Note: If only one sink is available in a classroom then it may be used for both handwashing and food preparation as long as the sink is sanitized before each instance of food preparation. This procedure is posted at the sink.

VERIFICATION V NV

B-25) Is equipment child-sized and adjusted for the developmental ages of all children in care? Yes No

VERIFICATION V NV
B-26) Does each classroom or area have storage space for staff materials and classroom supplies?  
Yes  No

VERIFICATION  V  NV

B-27) Are staff member’s personal items, hot beverages, and medication limited to a designated area which is inaccessible to children?  
Yes  No

VERIFICATION  V  NV

B-28) Does the program provide space for gross motor play/development inside the program on days when outdoor experiences are inappropriate?*  
Yes  No

*Please Note: This standard does not require a separate specific indoor gross motor area, but requires that gross motor play/development can be made available in the classroom on days when outdoor play is unavailable.

VERIFICATION  V  NV

B-29) If indoor climbing equipment is used that is over 18 inches high, is it:

A) Placed on impact-absorbing surfacing?*  
Yes  No  N/A

B) And which extends 6 feet beyond** the perimeter of the equipment?  
Yes  No  N/A

*Please Note: Item A) Evidence of this standard may be the manufacturer’s guidelines on the surfacing’s instillation and approved use. Include a hard copy of this in your labeled documentation file/box for item B-29.

**Please Note: Item B) If, and only if, state regulations/licensing permits the surface material to extend a minimum of 4 feet beyond the perimeter of the equipment, answer No to Item B and include a hard copy of the specific state regulation in your labeled documentation box/file for Item B-29.

VERIFICATION  V  NV
B-30) All cleaning materials present at the program must be:

A) Stored in labeled containers;  
   Yes  No

B) Used according to the manufacturer’s instructions and the specific purpose;

VERIFICATION  V  NV
B-35) Do teachers enhance interactions with the children in their care by:

A) Frequently talking with individual children using clear and correct language patterns and maintaining eye contact?  
   Yes  No

B) Using affectionate and supportive speech when appropriate?  
   Yes  No

C) Engaging in back and forth communication with children that expands upon children’s communication?  
   Yes  No

D) Listening attentively to children, trying to understand what they want to communicate, and assisting them in expressing themselves?  
   Yes  No

E) Encouraging children to share experiences, ideas and feelings of affection, joy, delight, sadness, anger, and other emotional responses to everyday events?  
   Yes  No

F) Responding sensitively when children are frustrated, angry and/or afraid (i.e. when they are separating from their parents)?  
   Yes  No

G) Responding in a reassuring and nurturing manner when a child seeks support?  
   Yes  No

H) Using positive reinforcement to encourage children to feel good about their individual and group accomplishments?

B-84) Are separate indoor areas/classrooms provided to meet the developmental needs of different age groups (including school-age) enrolled in the program? Yes  No

VERIFICATION V  NV

B-85) Are separate interest areas/learning areas created in the program for each age group that meet the following:

A) Are materials with similar use placed together to create interest areas/learning centers which correspond to the program’s curriculum? Yes  No

B) Are interest areas/learning centers organized, accessible, and inviting to children? Yes  No

C) Are areas/centers set up so that traffic patterns do not interfere with activities? Yes  No

D) Are areas/centers for quiet and active play separate? Yes  No

E) Is there space enough in each area/center to ensure children can comfortably maneuver? Yes  No

F) Is children's work displayed at children’s eye-level? Yes  No

VERIFICATION V  NV

B-86) Is furniture and equipment intentionally placed to ensure:

A) The safety of children and prevent unintentional injuries? Yes  No

B) Proper supervision of all areas, both inside and outside? Yes  No

VERIFICATION V  NV

B-87) Are dividers and/or furniture that are used to separate one area from another low enough to provide for easy supervision of all children? Yes  No

VERIFICATION V  NV
B-88) Has the program created a warm, nurturing, and comfortable atmosphere for
the children by:

A) Displaying photographs of children and their families at
child's eye level? Yes No

B) Providing personalized storage for each child's
possessions? Yes No

C) Personalizing/labeling nap time/rest materials? Yes No

VERIFICATION V NV

B-89) Is there a separate quiet place to provide a break from group
activities, where children can read or engage in individualized
developmentally appropriate learning activities?

AND, is the quiet area:

A) A soft-cushioned area with soft furniture or pillows, rugs
and/or carpeting? Yes No

B) Within sight and sound of a teacher? Yes No

VERIFICATION V NV

B-90) Are daily routines consistent and predictable for children?* Yes No

*Please Note: Evidence of this standard is a posted schedule that generally relates to the
observed routine.

VERIFICATION V NV

B-91) Are simple and consistent patterns followed in making transitions
from one activity to the next? Yes No

Section 10(A): Dedicated/On-Site Outdoor Play Space

Please Note: If the program does not have a dedicated or on-site playground/outdoor play space, the program MUST select N/A for items B-125 through B-127 AND complete Section 10(B): Outdoor Safety, Supervision and Activities.

B-125) Does the program have a dedicated/on-site outdoor play space?  
Yes  No  N/A

VERIFICATION  V  NV
Does the program's dedicated outdoor space meet the following requirements:

A) Is adjacent to the interior classrooms OR can be safely accessed from the facility? Yes  No  N/A
B) Includes vacant space for gross motor activities such as running and chasing? Yes  No  N/A
C) Outdoor play equipment is grouped together by age and developmental ability? Yes  No  N/A
D) Outdoor play equipment is of safe design and in good repair? Yes  No  N/A
E) Is free from holes or abandoned wells within the site? Yes  No  N/A
F) Is well drained with no standing water on the play areas or equipment? Yes  No  N/A
G) Enclosed within a fence or barrier that does not obstruct supervision of children? Yes  No  N/A

VERIFICATION  V   NV

Does the playground surfacing and fall zones meet current Consumer Product Safety Commission (CPSC) guidelines* through the following:

A) The surfacing is made of appropriate non-abrasive, cushioning materials as recommended by the CPSC? Yes  No  N/A
B) The surfacing extends at least 6 feet beyond** the perimeter of any playground equipment needing fall zones? Yes  No  N/A
C) If the playground is surfaced with CPSC recommended 'loose-fill' materials, (ex: wood mulch or chips, fine loose sand, pea gravel, or shredded tires), does it meet an initial fill of 12 inches and/or a compressed/settled fill of 9 inches? Yes  No  N/A

*Please Note: Examples of fall zones and additional recommended playground surfacing materials may be found in the Glossary on page 132.

**Please Note: Item B) If, and only if, state regulations/licensing permits the surface material to extend a minimum of 4 feet beyond the perimeter of the equipment, answer No to Item B and include a hard copy of the specific state regulation in your labeled documentation box/file for Item B-127.

Adequate Storage Space. The storage required is for extra toys and supplies that are not currently being used by the children and adults. The storage must be accessible to staff with only a momentary interruption of the visual supervision of children. Examples of convenient storage include:

- A built in closet or cupboard in the room,
- A high shelf in the room that only adults can reach,
- A closed cabinet that is added to the room to provide storage.

Age Group. NECPA defines age groups as follows:

<table>

Bleach/Water Solution. For disinfecting environmental surfaces. One-quarter (1/4) cup of household liquid chlorine bleach (sodium hypochloride) in one gallon of water, prepared fresh daily. See also Disinfect.

Body Fluids. Urine, feces, saliva, blood, nasal discharge, eye discharge, and injury or tissue discharge.

CDC. Abbreviation for the Centers for Disease Control and Prevention.
Child Sized. Furniture shall be durable and child-sized or adapted for children’s use. Tables shall be at waist height of the intended child-user and the child’s feet shall be able to reach a firm surface while the child is seated.

Children with Special Needs. NECPA defers to the Individuals with Disabilities Education Act (IDEA) and the U.S. Department of Education’s Office for Civil Rights (OCR) to define children with special needs.

Choking Hazard. NECPA defers to Caring for Our Children, “Standard 4.5.0.10: Foods that Are Choking Hazards.” Caregivers/teachers should not offer to children under four years of age foods that are associated with young children’s choking incidents (round, hard, small, thick and sticky, smooth, compressible or dense, or slippery). Examples of these foods are hot dogs and other meat sticks (whole or sliced into rounds), raw carrot rounds, whole grapes, hard candy, nuts, seeds, raw peas, hard pretzels, chips, peanuts, popcorn, rice cakes, marshmallows, spoonfuls of peanut butter, and chunks of meat larger than can be swallowed whole. Food for infants should be cut into pieces one-quarter inch or smaller, food for toddlers should be cut into pieces one-half inch or smaller to prevent choking.”

Clean. To remove dirt and debris by scrubbing and washing with a detergent solution and rinsing with water.

Communicable Disease. A disease caused by a microorganism (bacterium, virus, fungus, or parasite) that can be transmitted from person to person via an infected body fluid or respiratory spray, with or without an intermediary agent (such as a louse, mosquito) or environmental object (such as a table surface).

Compliance. The act of carrying out a recommendation, policy, or procedure.

Contamination. The presence of infectious microorganisms in or on the body, on environmental surfaces, on articles of clothing, or in food or water.

CPSC. Abbreviation for the U.S. Consumer Product Safety Commission, created in 1972 and charged with the following responsibilities: (1) to protect the public against unreasonable risks of injury associated with consumer products; (2) to assist consumers in evaluating the comparative safety of consumer products; (3) to develop uniform safety standards for consumer products and to minimize conflicting state and local regulations; and (4) to promote research and investigation into the causes and prevention of product-related deaths, illnesses, and injuries.

Daily Health Screening/Check. Assessment of a child’s health each day through observation of the child, talking with the parent/guardian, and if applicable, with the child.

Demand Feeding. The feeding of infants whenever they indicate that they need to be fed, rather than feeding according to a clock schedule.

Developmentally Appropriate Practice. Developmentally Appropriate Practice, or DAP, was built upon knowledge of how children develop and learn. Because development and learning are so complex, no one theory sufficiently explains these events. DAP is built around a review of the literature on early childhood education. From this review, a set of twelve empirically based principles were developed to inform early childhood practice (Bredecamp and Copple, 1997, p. 9). These twelve principles are as follows:
1. Domains of children’s development – physical, social, emotional, and cognitive -are closely related. Development in one domain influences and is influenced by development in other domains.

2. Development occurs in a relatively orderly sequence, with later abilities, skills, and knowledge building on those already acquired.

3. Development proceeds at varying rates from child to child as well as unevenly within different areas of each child’s functioning.

4. Early experiences have both cumulative and delayed effects on individual children’s development; optimal periods exist for certain types of development and learning.

5. Development proceeds in predictable directions toward greater complexity, organization, and internalization.

6. Development and learning occur in and are influenced by multiple social and cultural contexts.

7. Children are active learners, drawing on direct physical and social experiences as well as culturally transmitted knowledge to construct their own understanding of the world around them.

8. Development and learning result from interaction of biological maturation and the environment, which includes both the physical and social worlds that children live in.

9. Play is an important vehicle for children’s social, emotional, and cognitive development, as well as a reflection of their development.

10. Development advances when children have opportunities to practice newly acquired skills as well as when they experience a challenge just beyond the level of their present mastery.

11. Children demonstrate different modes of knowing and learning and different ways of representing what they know.

12. Children develop and learn best in the context of a community where they are safe and valued, their physical needs are met, and they feel psychologically secure.

**Developmental Challenges and Risks.** Physical, emotional, and mental tasks that encourage new skills are developmental challenges. Meeting those challenges means taking some risks. For example, to stand upright, a crawler risks falling. Young children need to be able to take such risks. However, while they are trying new skills that are right for their development, young children do need to be protected from real harm. Learning to walk means taking some falls. But that means falling on a carpet, a mat, or a floor, not off a ledge. Toddlers especially need safe risks. They need to discover the right balance between risk and safety, challenge and security. A space for both infants and toddlers should have a variety of physical challenges. Waterbeds, horizontal nets, mats, mattresses, lofts, and wading pools full of covered foam pieces or pillows can all encourage coordination, balance, and climbing skills.

**Developmental Needs.** General age related needs that are addressed by providing activities, materials, interactions and experiences in a safe, healthy, and challenging way to children.
Disinfect. To eliminate virtually all germs from inanimate surfaces through the use of chemicals (e.g., products registered with the U.S. Environmental Protection Agency as "disinfectants") or physical agents (e.g., heat). In the child care environment, a 1:64 dilution of domestic bleach made by mixing a solution of 1/4 cup household liquid chlorine bleach with 1 gallon of tap water and prepared fresh daily is an effective method to remove germs from environmental surfaces and other inanimate objects that have been contaminated with body fluids (see Body Fluids), provided that the surfaces have first been cleaned (see Clean) of organic material before applying bleach/water solution and to achieve maximum germ reduction with bleach, the precleaned surfaces should be left moderately or glistening wet with the bleach solution and allowed to air dry or be dried only after at least 2 minutes of contact time. Two minutes of contact with a coating of a sprayed 1:64 diluted solution of 1/4 cup household liquid chlorine bleach in one gallon of tap water prepared fresh daily is an effective method of surface-sanitizing of environmental surfaces and other inanimate objects that have first been thoroughly cleaned of organic soil. Commercially prepared detergent-sanitizer solutions or detergent cleaning, rinsing and application of a non bleach sanitizer that is at least as effective as the chlorine bleach solution is acceptable as long as these products are nontoxic for children, are used according to the manufacturer’s instructions and are approved by the state or local health department for use as a disinfectant in place of the bleach solution. These methods are used for toys, children's table tops, diaper changing tables, food utensils, and any other object or surface that is significantly contaminated with body fluids. Sanitizing food utensils can be accomplished by using a dishwasher or equivalent process, usually involving more dilute chemicals than are required for other surfaces.

Economic Concepts. Providing children with activities and situations where they can gain the knowledge and skills to understand concepts such as value, cost, want vs. need, resources, scarcity, etc.

Emergency Response Practices. Procedures used to call for emergency medical assistance, to reach parents or emergency contacts, to arrange for transfer to medical assistance, and to render first aid to the injured person.

Emergent Literacy. This is the use of children’s literature throughout the total curriculum. It is not using it only in the quiet/reading activity area but in all activity areas. Excellent examples of how this is done can be found in the following publications by Janice Beaty: “Observing Young Children and Developmentally Appropriate Curriculum.”

Emotional Tone. The general feeling created by a room or area is the emotional tone. But it is not just a feeling; the emotional tone affects behavior. The emotional tone of an area should match its function. For example, the emotional tone of the rest area should promote a quiet, secure, relaxed feeling. You create emotional tones with pillows, colors, fabrics, rugs, curtains, aquariums, lighting, and arrangement. More active play calls for a space that has more color, is harder and brighter, and is more open.

EPA. Abbreviation for the U.S. Environmental Protection Agency, established in 1970, which administers federal programs on air and water pollution, solid waste disposal, pesticide regulation, and radiation and noise control.

EPSDT. Abbreviation for Medicaid's Early Periodic Screening and Diagnostic Treatment program, which provides health assessments and follow-up services to income-eligible children.

Evaluation. Impressions and recommendations formed after a careful appraisal and study.
Exclusion. Denying admission of an ill child or staff member to a program.

Facility. The buildings, the grounds, the equipment, and the people involved in providing child care of any type.

Fever. An elevation of body temperature. Temperature above 101°F (38.3°C) orally, above 102°F (38.9°C) rectally, or 100°F (37.8°C) or higher taken axillary (armpit) or measured by an equivalent method.

Foodborne Pathogen. A germ contained in a food product that is transmitted to persons eating the food.

Gross-Motor Skills. Large movements involving the arms, legs, feet, or the entire body (such as crawling, running, and jumping).

Group Size. The number of children assigned to a teacher or team of teachers occupying an individual classroom or well-defined space within a larger room. See also Age Group and Ratio.

Health Care Provider. A health care professional who practices medicine by an established licensing body with or without supervision. The most common types of health care providers include physicians, nurse practitioners, and physician’s assistants.

Health or Medical Consultant. A physician, certified pediatric or family nurse practitioner, or registered nurse who has pediatric or child care experience and is knowledgeable in child care, licensing, and community resources. The health consultant provides guidance and assistance to child care staff on health aspects of the facility.

Health Plan. A written document that describes emergency health and safety procedures, general health policies and procedures, and policies covering the management of mild illness, injury prevention, and occupational health and safety.

Illness log. The program maintains a file or log, tracking all situations where illnesses are reported by a parent or become evident while a child or staff member is at the facility and may potentially require exclusion.

Immunizations. Vaccines that are given to children and adults to help them develop protection (antibodies) against specific infections.

Incubation Period. Time between exposure to an infectious microorganism and beginning of symptoms.

Individualized Education Program (IEP). A written document, derived from Part B of IDEA (the Individuals with Disabilities Education Act—PL 94-142), that is designed to meet a child's individual educational program needs. The main purposes for an IEP are to set reasonable learning goals and to state the services that the school district will provide for a child with special educational needs. Every child who is qualified for special educational services provided by the school is required to have an IEP.

Individualized Family Service Plan (IFSP). A written document, derived from Part C of IDEA (the Individuals with Disabilities Education Act), that is formulated in collaboration with the family to meet the needs of a child with a developmental disability or delay, to assist the family in its care for a child’s educational, therapeutic, and health needs, and to deal with the family’s needs to the extent to which the family wishes assistance.
Infection. A condition caused by the multiplication of an infectious agent in the body.

Ingestion. The act of taking material (whether food or other substances) into the body through the mouth.

Injury Log. When an injury occurs in the program that requires first aid or medical attention for a child or adult, the program shall complete a report form.

Medications. Any substance that is intended to diagnose, cure, treat, or prevent disease or is intended to affect the structure or function of the body of humans or other animals.

Midinfancy. The middle of the infancy period or the first year of life, that is, approximately 9 to 15 months of life.

Nonprescription Medications. Drugs that are generally regarded as safe for use if the label directions and warnings are followed. Nonprescription medications are also called “over-the-counter” (OTC) drugs because they can be purchased without a prescription from a health care provider. Foods or cosmetics that are also intended to treat or prevent disease or affect the functions of the human body (such as suntan lotion, fluoride toothpaste, antiperspirant deodorants, or antidandruff shampoo) are also considered to be nonprescription medications.

Organization. Environmental organization is a system of arrangement. The arrangement can be of anything: space, materials, books, or toys. A system of arrangement creates guidelines that show where things go and why. For example, environmental organization would mean putting the wheeled riding toys in the large-motor area. Hand toys would go on a shelf in a play area. Soft, cuddly toys might go in the rest or quiet areas. The best organization is simple and orderly; items used together are arranged together - water toys near the water troughs, and art materials near the art workspace. Infants and toddlers are trying to make sense of the world, and organization makes the job easier for them. The children learn to expect certain things in certain places. Organization also makes caregiving easier. When the setting is well organized, children can find things for themselves and help put them away. You can tell the toddlers: "The crayons are in the art center." "The block goes next to its picture here."

OSHA. Abbreviation for the Occupational Safety and Health Administration of the U.S. Department of Labor, which regulates health and safety in the workplace.

Parent Education. Parent education shall be culturally sensitive. Written material shall address health and safety issues for all age groups served and in a language understood by families.

Positive Guidance. This form of discipline includes redirection and setting clear cut limits that foster the child’s ability to become self-disciplined. Disciplinary measures shall be clear and understandable to the child, shall be consistent, and shall be explained to the child before and at the time of any disciplinary action.
**Prescription Medications.** Medications that can only be dispensed by a licensed practitioner, such as a physician or nurse practitioner.

**Pro-Social.** Pro-social behaviors include those that encourage kindness and cooperation within the classroom community. Teachers can help promote pro social awareness and learning by creating opportunities for children to participate in situations that encourage kindness. Teachers can act as coaches for children’s emotions and emotional regulation. This includes responding to children’s emotional displays, labeling the emotions, and in a supportive manner helping children with strategies to regulate their emotional displays.

**Qualified Teacher.** Qualified teacher means the early childhood professional that is the staff person providing direct care and education to children. All teachers must be 18 years of age or older. Persons younger than 18 may assist in the child care program if they have direct, on site supervision, however they are not considered to be a qualified teacher. A qualified teacher is one that meets all NECPA requirements.

**Ratios.** The maximum number of children permitted per teacher. NECPA recommends child:staff ratios as follows:

<table>
<thead>
<tr>
<th>Age Group</th>
<th>Age Range</th>
<th>Child:Staff Ratio</th>
<th>Max Group Size</th>
</tr>
</thead>
<tbody>

**Sanitize.** To remove filth or soil and small amounts of certain bacteria. For an inanimate surface to be considered sanitary, the surface must be clean (see Clean) and the number of germs must be reduced to such a level that disease transmission by that surface is unlikely. This procedure is less rigorous than disinfection (see Disinfect) and is applicable to a wide variety of routine housekeeping procedures involving, for example, bedding, bathrooms, kitchen countertops, floors, and walls. A number of EPA-registered "detergent-disinfectant" products are also appropriate for sanitizing.

**School-Age Child.** This term describes a developmental period associated with a child who is enrolled in an elementary school, usually from 5 to 12 years of age.

**School-Age Child Care Program.** A center offering a program of activities before and after school and/or during vacations.

**Screening.** Individual examination to detect the need for additional health related evaluations, early intervention and/or treatment.

**Special Evacuation Equipment/Crib.** A modified standard size steel crib with large wheels that meets fire standards used for the evacuation of non-walking children from the child development facility during emergency situations. (Department of Defense (2006), Child Development Policy Institute).
Staff. Used here to indicate all personnel employed at the program, including both teachers and as personnel who do not provide direct care to the children (such as cooks, drivers, and housekeeping personnel).

Substitute Staff. Teachers hired for one day or for an extended period of time, who work under direct supervision of a trained, licensed/certified permanent teacher. Substitute staff must successfully complete the criminal background checks and meet, at a minimum, the qualifications for “Assistant Teachers”.

Sudden Infant Death Syndrome (SIDS). The sudden and unexpected death of an apparently healthy infant, typically occurring between the ages of 3 weeks and 5 months and not explained by an autopsy.

Sufficient Quantity. Children can use the equipment or materials without having to wait with no other appropriate equipment or material options. Numerous materials/equipment are not required and no specific number of materials/equipment is needed. Verifiers will observe to see if there is something for each child to use.

Supervision. Teachers shall directly supervise infants, toddlers, and preschool children by sight and hearing at all times, even when the children are in sleeping areas.

Systemic. Pertaining to a whole body rather than to one of its parts.

Technology. Technology includes both high and low forms. High technology may include computers, tablets, listening centers, and other forms of age appropriate tools. Low technology may include gears or wheels and other forms of age appropriate simple tools.

Transmission. The passing of an infectious organism or germ from person to person.

Universal Precautions. Apply to blood, other body fluids containing blood, but not to feces, nasal secretions, sputum, sweat, tears, urine, saliva and vomitus unless they contain visible blood or are likely to contain blood. Universal precautions include avoiding injuries caused by sharp instruments or devices and the use of protective barriers such as gloves, gowns, aprons, masks, or protective eyewear, which can reduce the risk of exposure of the worker’s skin or mucous membranes that could come in contact with materials that may contain blood-borne pathogens while the worker is providing first aid or care.

Variety. An environment that offers plenty of choices has variety. Variety means choices about what to look at, what to hear, what or whom to play with, and what to do. When certain areas are set up for particular activities, the environment offers variety. When the environment meets the changing needs of both infants and toddlers, it has variety. Another example of variety is texture. A child care setting can offer a rich variety of textures: the smooth floor, the rough rug, the porcelain sink, the wood tabletop, the nubby fabric on the couch, or the soft velvet pillow on the floor. You can offer variety for the senses by pulling the shades or using a dimmer to change the lighting, putting up new materials and pictures, playing different kinds of music or tapes, bringing in a large new plant, changing the toys, or offering a new art activity.
